

GLOBAL PERSPECTIVES ON LEGAL HISTORY

A Max Planck Institute for Legal History and Legal Theory
Open Access Publication Series

The treaties to suppress the slave trade were the subject of intense legal battles in the first half of the 19th century. This book explores the legal disputes about the Anglo-Brazilian treaty to highlight the political importance of what initially looks like mere argumentative hurdles over the rules and proceedings regarding the search and capture of ships. It reveals the complex legal translations of state inequality, abolition and slavery, as well as war and peace.

Adriane Sanctis de Brito received her doctorate from the University of São Paulo with this thesis. Her research focuses on the international history of legal imagination related to peace, humanitarianism, and the suppression of the slave trade. She is a co-founder of the Brazilian think tank LAUT.
