

Historical Dictionary of Canon Law in Hispanic America and the Philippines

Corpus of digitized sources in a timeline

With more than 120 entries, 4,000 pages and extensive cross-references, our historical dictionary is a reliable reference work on fundamental concepts of canon law in colonial Hispanic America.

Based on primary sources such as royal and pontifical legislations, local ecclesiastical councils, practical manuals and local customs, it explores the central role of religious normativity in Latin American history and the emergence of special regulations and distinct institutions for the diverse territories and actors in the New World.

Blog with published lemmas

The collaborative process behind this project has developed a vibrant international community of junior and senior scholars that involves more than 90 authors from around the world.

By focusing on the analysis of the production of religious normativity, the DCH incorporates also contemporary historiographical insights, providing new perspectives for each of the entries.
